VI Brief justification of the Project:

Mobile Library cum Audio Visual Unit

(for Awareness towards Education, Genetic Diseases, Economic Empowerment etc., among tribal poor)

Audio Visual Unit Van with led screen interactive panel display for Awareness education

The ST population represents one of the most economically impoverished and marginalized. The tribal people suffer from very poor condition in terms of Hygiene, Poverty, Safe drinking water and Education etc.

Education is in fact, an input not only for economic development of tribes but also for inner strength of a deprived community which helps in meet the new challenges of life. Poor Child birth and nutrition standards lead to high IMR and MMR; Open defecation, lack of sanitary latrines for girl children; Poor awareness of STD/HIV, also compound health problems and high prevalence of drug use. The skill development particularly among tribal women would be mainly pertaining to Agriculture, Afforestation, farm forestry, papad making, mat weaving, sewing sustainable livelihood and so on. Women in tribal often face abuse situation related to domestic violation, Physical and mental torture wife beating and so forth. They also face barriers due to bias and discrimination behavior common in Society.

So, PWDS-NGO has come to occupy an important role in awareness, motivation, Development and advocacy activities through this program. Protecting the rights of marginalizing segments, Empowering Weaker sections, spreading literacy and increase the potential for future living, Participation of NGO sector has been crucial and to be impressive. Besides providing participatory measures in development initiatives, Tribal have been voicing their concerns through a variety of ways. They also have to deal with State and Central Government machinery, local politics and agendas of funding sources.
